

# Caring for a Child with Congenital Heart Disease

This 31-page book is written especially for parents of a child with congenital heart disease (CHD). It is our attempt to provide you with answers to the day-to-day questions and concerns you may have about raising a child with CHD and the impact his or her congenital heart condition may have on your family.

Although written primarily for parents of infants and toddlers, we will highlight other areas of concern that parents wonder about as their child grows – such as future hospitalizations. Lastly, we will concentrate on “wellness” and those needs unrelated to the heart.
